## + ABOUT ME

UX Designer with close to a year of hands-on design experience, backed by 5+ years diagnosing operational problems in real-time analysis and reporting, including root-causing service outages and payroll failures. I apply evidence-first thinking to design, building tools that validate demand before committing engineering time and interfaces that cut friction for real users.

## + SKILLS

**DESIGN**

Figma, Wireframing, Prototyping, User Flow Mapping, Design Documentation, Heuristic Evaluation

**ANALYTICS**

Real-Time Reporting, Data-Driven Decision Support, Root-Cause Analysis, Process Improvement

**AI-ASSISTED DEV**

Claude, Codex, Gemini (for rapid prototyping & workarounds)

**TOOLS**

Figma, Canva, Supabase, Vercel, Google Workspace

## + EDUCATION

**CIIT College of Arts & Tech**
2024
**SPECIALIST DEGREE, UI/UX ESSENTIALS**

**University of the East**
2007 - 2009
**BS INFORMATION TECHNOLOGY**

## + WORK EXPERIENCE

**Ingnius Systems** — JAN - NOV 2025
**JUNIOR UX DESIGNER**

- Redesigned a cluttered landing page into a simplified layout, taking it from concept through launch with developers and the CEO to reduce overwhelm for new and returning users.
- Built and maintained a client-facing wiki, giving clients self-serve answers instead of relying on support for repeat questions.
- Proposed a feedback prioritization framework, giving the team a consistent way to sequence client requests instead of reactive one-off fixes.

**Freelance** — NOV - DEC 2024
**UI DESIGNER**

- Designed UI mock-ups and interactive prototypes capturing core workflows for a client project, balancing usability against business goals.

**BroadPath / Concentrix / Sutherland / Stellar** — 2016 - 2024
**REAL-TIME ANALYST & REPORTING ANALYST**

- Supported real-time performance monitoring for accounts of 100 to 300 agents, flagging volume and staffing risks as they emerged.
- Rebuilt a recurring performance report into a pivot-based version, eliminating manual formula updates across days, weeks, and years.
- Traced a wave of unpaid agents during a payroll transition to misordered status codes, resolving it same-day.
- Identified an unexplained drop in call answer rates to a partner call center outage, prompting timely call rerouting.

## + VOLUNTEER WORK

**UXPH (UX Philippines)** — OCT 2025 - PRESENT
**CORE TEAM MEMBER**

- Led food logistics for the UXPH Mini Conference Manila across 33 volunteers; invited to join the Core Team afterward.
- Organized Volunteer Appreciation Night for 20+ attendees, closing the loop for the Manila conference team.

**Favor Church** — AUG 2025 - JUL 2026
**TECH TEAM VOLUNTEER**

- Directed 4 volunteers migrating ministry forms to Rock RMS, building custom multi-step conditional logic.
- Prototyped a Volunteer Health Dashboard to track serve history and flag burnout risks for admins and leads.

## + BEYOND WORK

- Volunteer, UXPH Core Team & Favor Church Tech Team
- Building GraceFul, a live passion project app
- Enjoys turning operational chaos into clear systems

## + FEATURED PROJECTS

### GraceFul

**LIVE PROJECT**

**PASSION PROJECT**

- Designed and shipped an anonymous prayer and sharing app end-to-end (graceful-space.vercel.app).

### Painted Door Validation Tool

**NO-CODE PIPELINE**

**UXPH PROJECT**

- Built a no-code validation tool with URL tracking and live Google Sheets dashboard to test demand for 5 workshop topics.
